

# TENDER TO DEVELOP SMARTPHONE/IPHONE APP

## **Request for Quotation:**

To program an app based on “**The South African Cocktail & Shooter Guide**” book & load it onto the **Google App Store** & the **Apple Store** for general downloading as a free application.

The existing book consists of 119 pages and includes 300 Cocktail & Shooter Recipes. (see sample on next page)

## **Browsing Function**

The app will enable users to browse the recipes:

- 1: Alphabetical Listing with a click thru directory
- 2: Scrolling/swiping to visually browse as if paging thru a physical book
- 3: By ingredient (ie: all the recipes that use Gin listed then click thru to any recipes listed)

## **Google Maps Function**

The app will feature a “Find My Nearest Liquor Store” function that opens Google Maps flagging a liquor store close by to the user’s current location.

So, something that functions like this: <https://near-me.store/en/liquor-store-near-me> but must be able to discriminate between Pick n Pay Liquor, Checkers Liquor, Spar Tops Liquor etc. and only display the preferred franchise ie. only Checkers liquor stores near me.

## **Materials (Images & Copy)**

Text & Images will be provided preformatted to size & file type specifications requested by the contractor.

Quotations can be sent to Clifford T Smith by WhatsApp 082-728-4229 or email [cliff@goldkeyeducation.com](mailto:cliff@goldkeyeducation.com)

Comment

Popular as a cure for hangovers, the Bloody Mary has been around since the early 1900s. This cocktail is sometimes served with the condiments on the side as everybody has their own personal taste. Originally called a Bucket of Blood, add a dash of sherry or port or a pinch of garlic salt to enhance flavour. Variation: Replace the vodka with tequila for a Bloody Maria or leave out the spirits altogether for a Virgin Mary.
